# selected projects

flick-radar JavaScript | A prototype of an app that tracks movies released by directors the users choose to follow

The backend RESTful api is built with Node.js, Express and MongoDB and deployed on Heroku

- The sdk for accessing the api endpoints is built as an npm module
- · The frontend is built with React

resume-maker JavaScript | An interactive resume-making tool

- Developed out of necessity for a simple resume-making tool with immediate visual response
- Built with vanilla JavaScript using functional programming principles
- · Used to create this resume

iTunesSearch C# | A library that acts as a wrapper for the iTunes search API

· Contributed new functionality to the library

data-wiz JavaScript | A Web app that visualizes Facebook Pages' insights

- Allowed to quickly select and visualize custom data to discover trends that would inform decisions on which kind of content should be prioritized
- The backend is built with Node.js and Express and deployed on Heroku
- The frontend is built with D3.js

Reservists' Database C# | An app to manage reservists

- A Windows desktop app written in C# using WPF, MVVM and TDD
- Replaced a decade-old web app

Guard Duty Scheduler C# | An app to create fair guard duty schedule

- A Windows desktop app written in C# using WPF, MVVM and TDD
- · Automated the process previously done manually and inefficiently

## work experience

10/2016--08/2018 Israel Defense Forces Software Developer

Freelance Writer

- Developed applications for the IDF's internal use (some of them are listed above: Guard Duty Scheduler, Reservists' Database, data-wiz)
- Discovered processes ripe for automation, promoted and initiated the development of software that would achieve that effect
- · Collected requirements, implemented business logic, performed user acceptance testing

## languages

poficient

English (IELTS 8.5 / 9) Russian (native)

familiar Hebrew · Write feature stories, interviews, columns and more

· Works have been published in the English-language Times of Israel and GameSinners and Russian-language Jewish.ru

02/2015--07/2015 BASICALLY Staff Writer and Editor ~ ad hoc Programmer

- · Wrote and edited short explanatory financial news stories · Composed daily newsletter and uploaded articles to the Android app via MailChimp and the Parse platform respectively
- · Wrote two C# console apps that streamlined the process of formatting the articles for the Android app and the newsletter
- 05/2013--05/2014

07/2015--Present

AT Consulting Systems Analyst

- Worked in a team of analysts and developers on a Web application for Beeline Customer Relationship Management System
- · Acquired skills of drawing system prototypes using Axure software, technical writing and user acceptance testing
- · Got a working knowledge of the JIRA bug tracking system
